CUSTOM GASKETS
Precisely cut gaskets made exactly to your drawings are the norm at MFI. We can provide you with correctly made gaskets from any type of material that you request. For example, if beater-add, or compressed non-asbestos gaskets are your requirement, we can provide them. If cork, cork & rubber, cellulose fiber, vulcanized fiber, open or closed cell sponge, felt, any type of rubber or silicone, any grade of plastic or laminates, or any other type of material not mentioned above that can be die cut is your requirement, then MFI is the company you want to call in order to assure that you receive exactly what you need, when you need it.

If you want your gaskets supplied with PSA backing, kiss cut & supplied in rolls with the web removed, MFI is the company you want to be working with.

PRECISION SHIMS
Whatever your application for high precision shims, should it be helicopter rotor shaft shims, drive shaft coupling shims, motor or alternator bearing shims, static coupling shims, color coded plastic shims, etc., Material Fabricators, Inc. is the company you want to have working for you to guarantee consistent accuracy for your product.

MATERIAL FABRICATORS, Inc. has been a proven leader in the manufacturing environment by delivering the highest quality gaskets, precision shims, special sized washers, metal stampings, die cut electrical insulators, etc. to our customers at competitive prices since 1946.

Our dedication to on-going improvement in our operations throughout the years has steadily expanded our production capabilities. By constantly providing precision stampings to correctly meet our customers requirements, on time, every time, we have grown to be one of the most respected suppliers of these types of products in the industry.

Our constant objective is to supply the highest quality stampings on time, every time. Applying our experience gained from serving a multitude of industries has proven beneficial to all of our customers. Whether it is a high volume stamping requirement, a pilot run, or prototyping that you need, we will exceed your expectations.
Need to hold a tolerance of ± .0001 on your metal shims? At MFI we manufacture shims to tight tolerances like this, and beyond, all the time. We can produce metal shims to light-band thickness tolerance requirements if necessary.

**DIE CUT ELECTRICAL INSULATORS**
Since our beginning in 1946, Material Fabricators, Inc. has provided the leading manufacturers of products such as aircraft instrumentation, medical analysis equipment, electronic machine monitoring equipment, computers, flow analysis and control equipment, etc., with the highest quality insulators made.

From kapton, mylar, nomex, phenolics, teflon, vulcanized fibre and laminates such as G-7, G-9, G-10, etc., to silicones and natural or pasted mica, we can supply your needs exactly.

Precise tooling to produce clean edge, flash or burr free close tolerance parts from thin films is one of our specialties. Let us work with you in this critical field.

**METAL STAMPINGS**
Precise, burr free, from any type of metal. From simple shapes to highly complex formed parts, from thin (down to .0005) up to 1/4" thick metal, we’re here for you.

There are many metal stamping companies to choose from. We hope our quality and service record will lead you to us.

Material Fabricators, Inc. has been producing precision metal stampings for the needs of the manufacturing industry for over 60 years. We can handle your requirements from simple metal washers to complex multi-stage progressive stampings.

**CUSTOM WASHERS**
We have the ability to turn your washer order around rapidly and cost effectively.

We can hold the tight tolerances that you require, fabricate to very thin wall dimensions, cut any type of material, and deliver the finished product on time, every time.

Our extensive tooling inventory and in-house die department means rapid turn around for you. Non standard sizes, special shapes, insulation washers, internal or external tooth washers, wave washers... whatever you need in custom stamped washers, we can handle it. High volume requirements? No problem.
